Fita Sofa, 2023

The Fita series takes its design inspiration from the casualness of improvisation. The structure is limited to foams of different densities that have been enveloped with a entire piece of fabric and tied with stripes that unites the different materials in this synthesis of laid-back comfort.

Available in two fabric options developed by WENTZ that have wool as the main raw material. The fabrics represent a new textile path for the brand by using natural and fibers and traditional weaving techniques.
